

# G. Harry Thurston

---

## PROFESSIONAL SUMMARY

GIS Professional with municipal and county experience managing and analyzing geospatial datasets to support planning, infrastructure, and environmental decision-making. Skilled in ArcGIS, Field Maps, and dashboard development to streamline workflows, improve operational efficiency, and enable data-driven decisions. Experienced in automating GIS processes and training teams for consistent data collection and adoption.

## WORK EXPERIENCE

February 2024 - March 2026

### **GIS Technician, City of Glens Falls, NY**

- Served as the city's sole GIS technician and primary liaison to Warren County Planning, managing and coordinating geospatial projects across departments.
- Reduced field lookup time for water and sewer crews by creating and maintaining interactive web maps in Field Maps.
- Developed dashboards and geographic layouts to support city departments in operations, planning, and project prioritization.
- Implemented a new Field Maps workflow for hydrant flushing and repair, improving field coordination and operational efficiency.
- Authored Field Maps instructions and trained DPW, water, and road crews expanding GIS adoption and ensuring consistent data collection.
- Collected and managed 6,582 public infrastructure data points (signs, signals, streetlights, utility poles) using the Skadi 300 RTK GNSS, improving sign maintenance.
- Produced land classification and impervious surface maps to support planning initiatives, regulatory compliance, and environmental analysis.
- Automated city tree data workflows with Arcade and ArcPy, streamlining management of plantings and removals; presented a tree inspection dashboard to the Tree Commission for informed decision-making.

June 2023 - August 2024

### **University of Vermont Spatial Analysis Lab Tech, Burlington VT**

- Fast paced environment, editing complex high-resolution tree canopy and land cover data under contract with the EPA, City of Phoenix, City of Indianapolis, NYC, and many others
- Utilized ArcGIS editing workflows to correct errors in automated outputs using LiDAR, NAIP, and orthophotos

## KEY SKILLS

- |                      |                     |                        |
|----------------------|---------------------|------------------------|
| - ArcGIS Pro         | - ArcGIS Dashboards | - Field Maps Designer  |
| - ArcGIS Tasks       | - ESRI Solutions    | - GNSS Data Collection |
| - Arcade             | - ArcGIS Notebooks  | - ArcGIS Online        |
| - Experience Builder | - Data Management   | - ArcPy                |

## EDUCATION

May 2024

### **University of Vermont**

**BA in Geography, Minor in Geospatial Technologies**
